

# Global Agenda Council Summit

November 28, 2013: The [Summit on the Global Agenda](#) is the world's largest brainstorming event, which annually convenes over 900 thought leaders from globally recognized expert communities for the World Economic Forum's Network of Global Agenda Councils. This year, council members, including our President, Dr. Sania Nishtar met at the Global Agenda Summit in Abu Dhabi from November 18-20. The summit was hosted by the World Economic Forum in partnership with the Government of the United Arab Emirates. In recognition of the transformations that businesses, economies and societies are facing, members at this year's Summit focused on ways of transforming new models into sustained processes in order to develop solutions for a greener and more socially inclusive world.
