

Launching the Reproductive Health eBulletin

July 14, 2014: On World Population Day, July 11, we launched our Reproductive Health eBulletin, in order to engage in advocacy for Family Planning and Reproductive Health sector in Pakistan. Posts by [Anne Keeling](#), UNFPA, [Yasmeen Qazi](#), Packard Foundation and [Shahida Fazil](#), Heartfile can be accessed. The Reproductive Health eBulletin is one of the newsletters of the Heartfile-hosted [Pakistan Health Policy Forum](#), a membership-based entity, supported by the David & Lucile Packard Foundation.

The Forum features commentaries, resources and updates about Pakistan-specific health and population-relevant systems issues; it is also an archive and a sounding board for relevant issues to be framed for deeper discussion. The moderator of the forum can be contacted for further details.
