

Prince Mahidol Award Conference

February 1, 2019: Dr. Sania Nishtar attended the Prime Prince Mahidol Award Conference and joined the plenary panel on “The Political Economy of the Determinants of NCDs”. The plenary session was intended to set the stage for several parallel sessions that followed that day. The purpose was to discuss the strategies for tackling major NCD risk factors (unhealthy diets, tobacco use, harmful use of alcohol, physical inactivity and environmental pollution) and the underlying determinants, focusing on the implementation of the cost-effective interventions to achieve SDG3.4 and other NCD-related targets; to share and learn from national, regional and global experiences in addressing the main risk factors of NCDs and their social, economic, commercial and political determinants and to discuss how to translate these experiences to other contexts; and to identify knowledge gaps and strategies to address them.
